

JOINT BKL

The Joint BKL is used for joining clay pipes to concrete chambers.

The Joint BKL consists of a lip seal according to jointing system F and a styrofoam bolster. This styrofoam bolster has to be removed before joining the clay pipe into the concrete chamber.

The Joint BKL is available in dimension [DN 150 and DN 200](#).

The Joint BKL conforms with the requirements of DIN EN 295-4.
