

LATERAL CONNECTOR

M55 / M70

MÜCHER M55 / M70					
Type	Min. Shaft Length (mm)	Min. Wall Thickness (mm)	Lateral Claypipe DN	Outside Diameter (mm)	Core Drill (mm)
M55	60	60	100	131	146
M70	75	75	150	186	200
			200	242	257
			250	296	311

The M55 / M70 are used for joining cut clay pipes (shaft length see table) to concrete main sewers and concrete manholes.

It should be taken into consideration, that the minimum wall thickness of the main sewer should always be 5 mm bigger than the chosen sealing.
